PERSONAL PROJECTS

Searching Tour Application (Java Spring Boot)
(07/2021 - 08/2021)

- It is an application that helps customers find places for visiting. The application consists of two parts. First is about Telegram Bot, and second part is about Agent side. There is a Telegram Bot that gives the customer questions such as where and when the customer wants to visit, how many people it consists of, how much money the customer has and etc.. After answering all questions by customer, request is sent to all agents that registered from application. If request is possible for any agents, they send offers with all important information with image to the customer's telegram.

Auto Shop (Java Spring Boot) (06/2021 - 06/2021)

- It is an application that helps customer sell their cars and buy new cars. It is like Turbo.az web application.
